

Detect, Protect & Manage all Client-Side Threats

Source Defense Platform

The solutions powered by the Source Defense Platform protect online businesses against automated attacks and client-side threats, and improve operational efficiency. Source Defense is an analyst-recognized pioneer and innovator of technologies that leverage machine learning, industry regulations and best practices to improve website security and efficiency. With our technology, you never have to choose between innovating and protecting what matters most, your customers & their data.

Key Capabilities

The Source Defense Platform delivers a foundation for a successful cybersecurity defense that enables organizations to:

- > Unify protection capabilities onto a single, easy-to-use interface that can be accessed and centrally controlled
- > Understand the nature and intention of client-side security breaches
- > Integrate technology actions and threat intelligence to further strengthen a company's cybersecurity posture

Why Source Defense

Client-Side Security Experts

Authoritative source on Magecart, Formjacking threats, Javascript libraries and open source risks

Best in Breed Technology

The only purpose-built, patented technology for real-time protection & detection

Website Integrity Assurance

Preserve the end-user experience eliminating unnecessary latency and protecting the customer journey

Admin

The administrative management console encompasses security management in an all-in-one, scalable system for full threat visibility and control across all your client-side security solutions.

VICE

VICE isolates all 3rd party JavaScript from the web page in real-time and leverages a fully automated and machine-learning assisted set of policies that control the access and permissions of all 3rd party tools operating on a website (including the 4th and 5th parties they chain-in).

WiPP

WiPP protects websites and web applications from online attacks originating from first-party code, insider threat attacks, and vulnerabilities introduced by open source libraries.

About
Source
Defense

Source Defense is the market leader in Client-side Security for websites, providing real-time threat detection, protection and prevention of vulnerabilities originating in JavaScript. The Source Defense patented Website Client-side Security Platform offers the most comprehensive & complete solution addressing threats and risks coming from the increased usage of JavaScript, libraries and open source in websites today.

The ADMIN management console, VICE sandboxing and WiPP data shield offerings utilize patented technology and are deployed by leading Fortune500 enterprises in the Financial, Retail, and Healthcare markets. Headquartered in Israel, with branches across the US and a strong community of global valuable partnerships, Source Defense is the most innovative, reliable and trusted partner in the fight against client-side attacks.
